# *Human Robotic Swarm Interaction Using An Artificial Physics Approach*

LT Brenton Campbell

## **ADVISORS:**

Asst Professor Dr. Timothy Chung

Senior Lecturer Richard Harkins

Monterey, California

[WWW.NPS.EDU](http://WWW.NPS.EDU)

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.					
1. REPORT DATE <b>DEC 2014</b>		2. REPORT TYPE		3. DATES COVERED <b>00-00-2014 to 00-00-2014</b>	
4. TITLE AND SUBTITLE <b>Human Robotic Swarm Interaction Using An Artificial Physics Approach (Briefing Charts)</b>				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S)				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) <b>Naval Postgraduate School, Monterey, CA, 93943</b>				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)				10. SPONSOR/MONITOR'S ACRONYM(S)	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S)	
12. DISTRIBUTION/AVAILABILITY STATEMENT <b>Approved for public release; distribution unlimited</b>					
13. SUPPLEMENTARY NOTES					
14. ABSTRACT					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT <b>Same as Report (SAR)</b>	18. NUMBER OF PAGES <b>22</b>	19a. NAME OF RESPONSIBLE PERSON
a. REPORT <b>unclassified</b>	b. ABSTRACT <b>unclassified</b>	c. THIS PAGE <b>unclassified</b>			

## Artificial Physics (AP)

- Based on Newtonian Physics  $\vec{F} = m \vec{a}$
- Each agent is treated as a point particle
  - Position  $x$
  - Velocity  $v$
- Discrete time step used to approximate continuous behavior

$$\Delta x = \vec{v} \Delta t$$

$$\Delta v = \frac{\vec{F} \Delta t}{m}$$

- Modeled after natural forces but not constrained to them
  - Attractive
  - Repulsive

$$\mathbf{F}_{\text{agent}} = \frac{GMM}{(d_{m,n})^p} \hat{\mathbf{r}}_{m,n}$$

# Using AP to Achieve Desired Agent Spacing

# Self Organization into a Lattice

After many  $\Delta t$

After many  $\Delta t$  but not too many  $\Delta t$

$$\mathbf{F}_{\text{operator}} = \frac{CM}{(d_{m,op})^p} \hat{\mathbf{r}}_{m,op} \quad \text{where} \quad d_{m,op} < 2d_{\text{desired}}$$

$$\mathbf{F}_{\text{operator}} = -CMd_{m,op} \hat{\mathbf{r}}_{m,op} \quad \text{where} \quad d_{m,op} \geq 2d_{\text{desired}}$$

- Parrot AR.Drone™
  - 802.11b/g wifi self generated hotspot
  - 12 minutes of flight
  - Two cameras
  - Six Degrees of Freedom
  - Miniaturized IMUs track pitch, roll, and yaw
- Large open source base

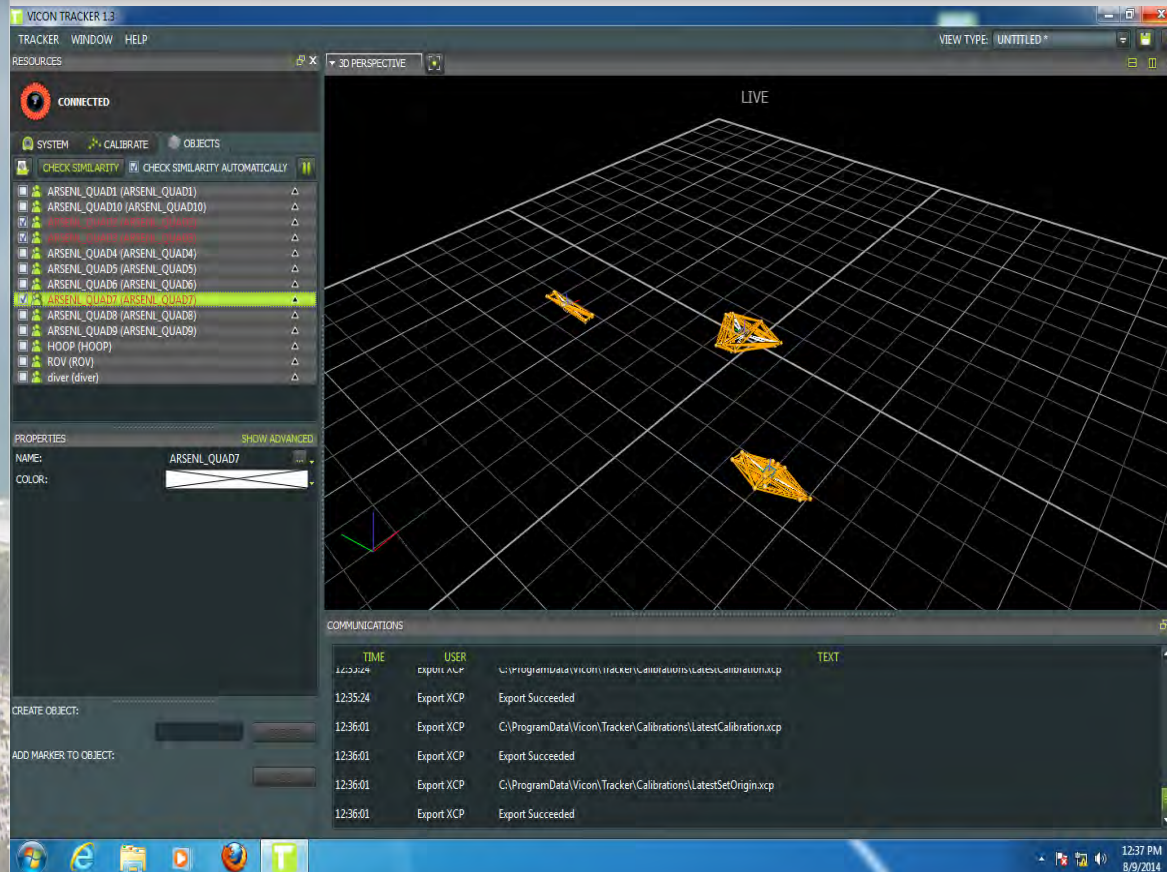

- VICON™
- 10 Cameras (and growing)
- Sub 1 cm accuracy
- x,y,z position and pitch,roll, yaw orientation

# Constellation Identification and Tracking

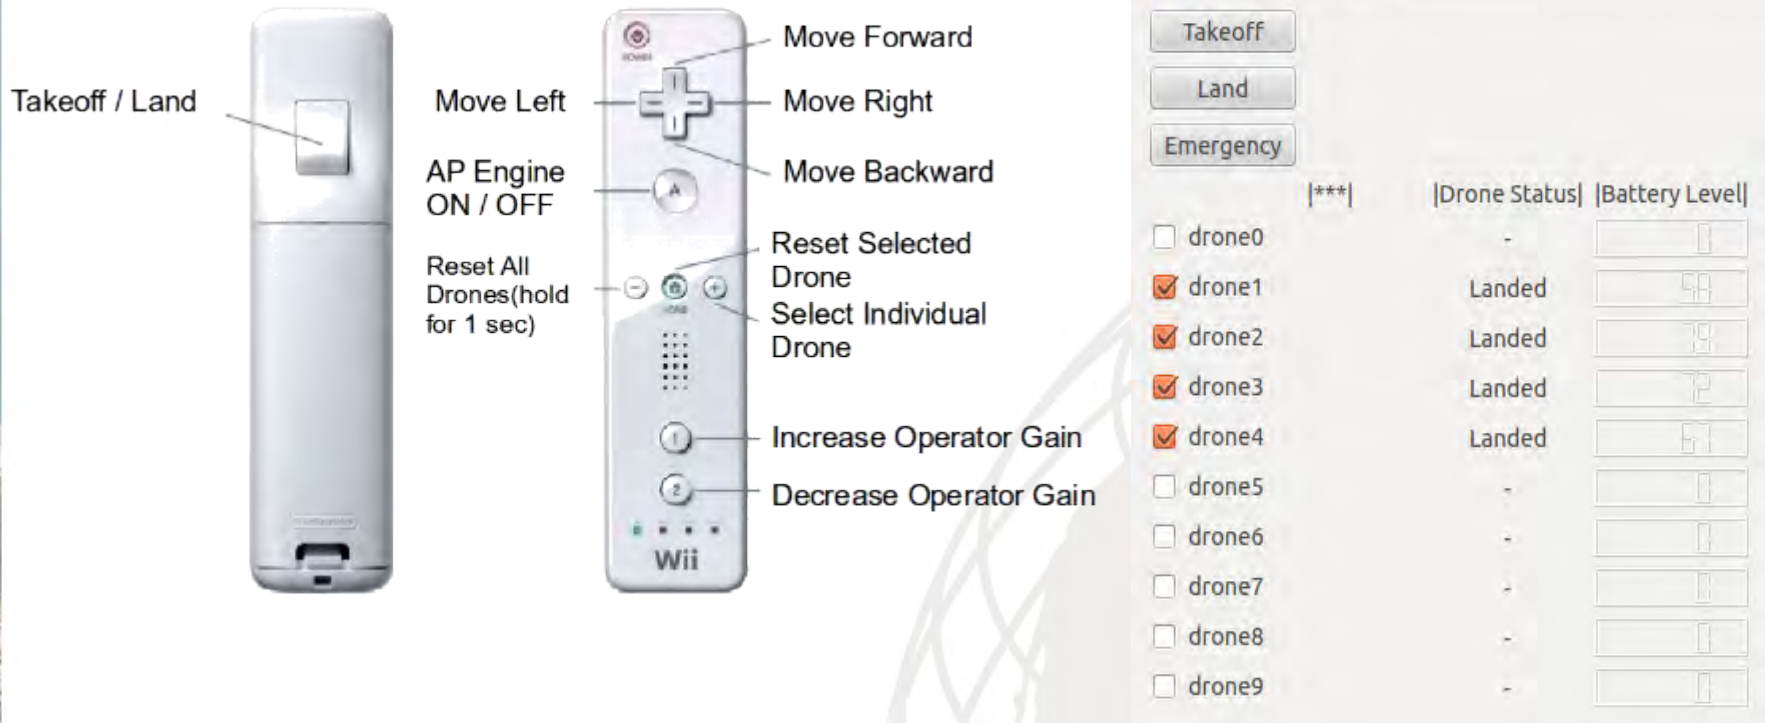

- IR reflectors, or markers, glued to objects
- Each object has a unique constellation
- Quaternions used to track orientation

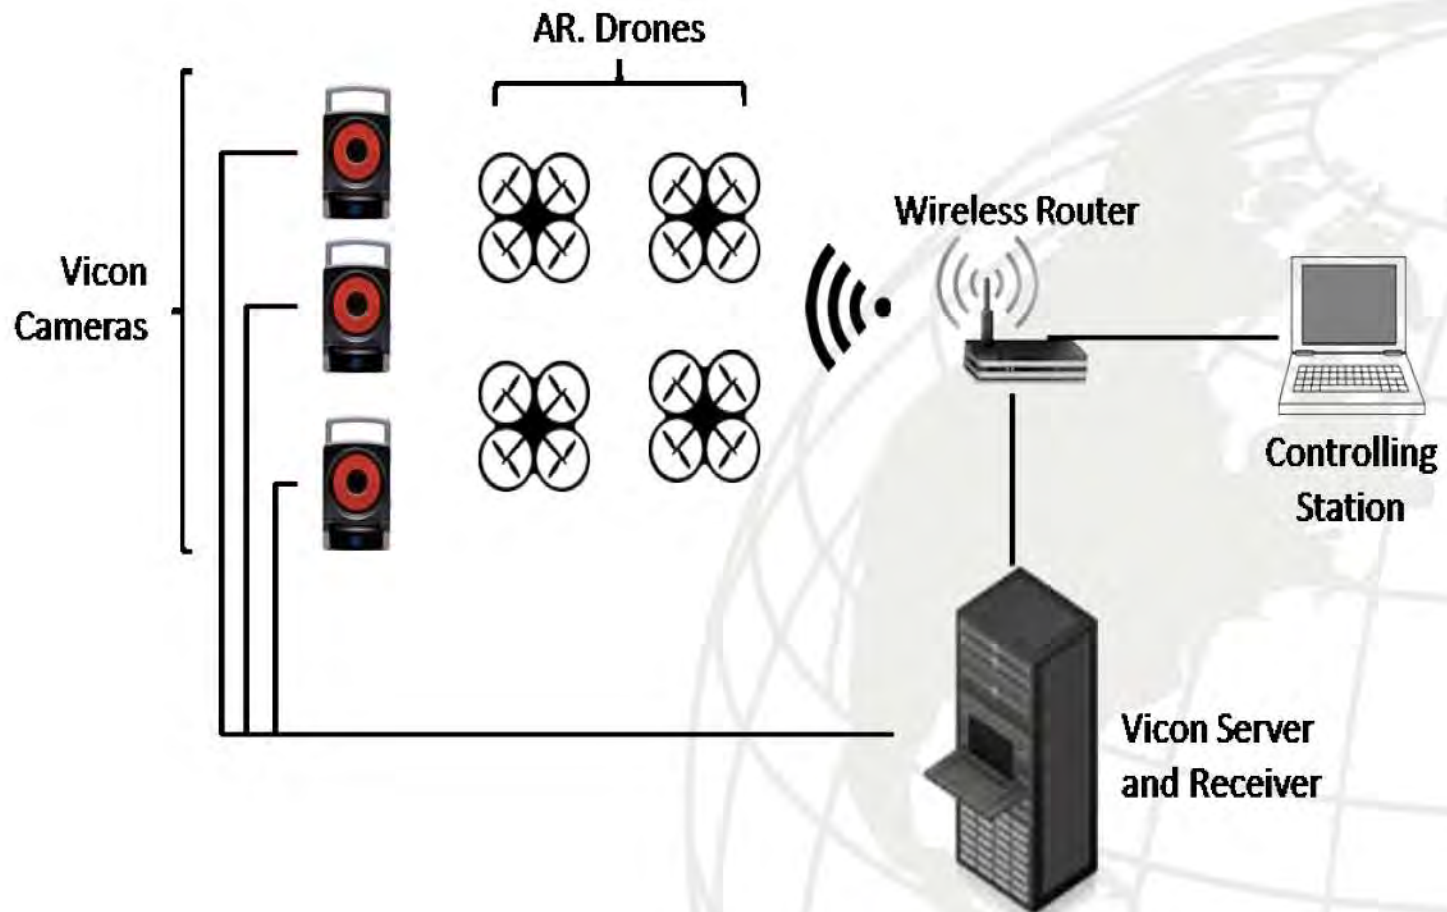

- Robotics Middleware
  - Hardware abstraction
  - Low-level device control
  - Implementation of commonly used functionality
  - Message-passing between processes
  - Package management
- Packages available for commonly available research and hobby grade sensors, controllers, and platforms
- Open Source

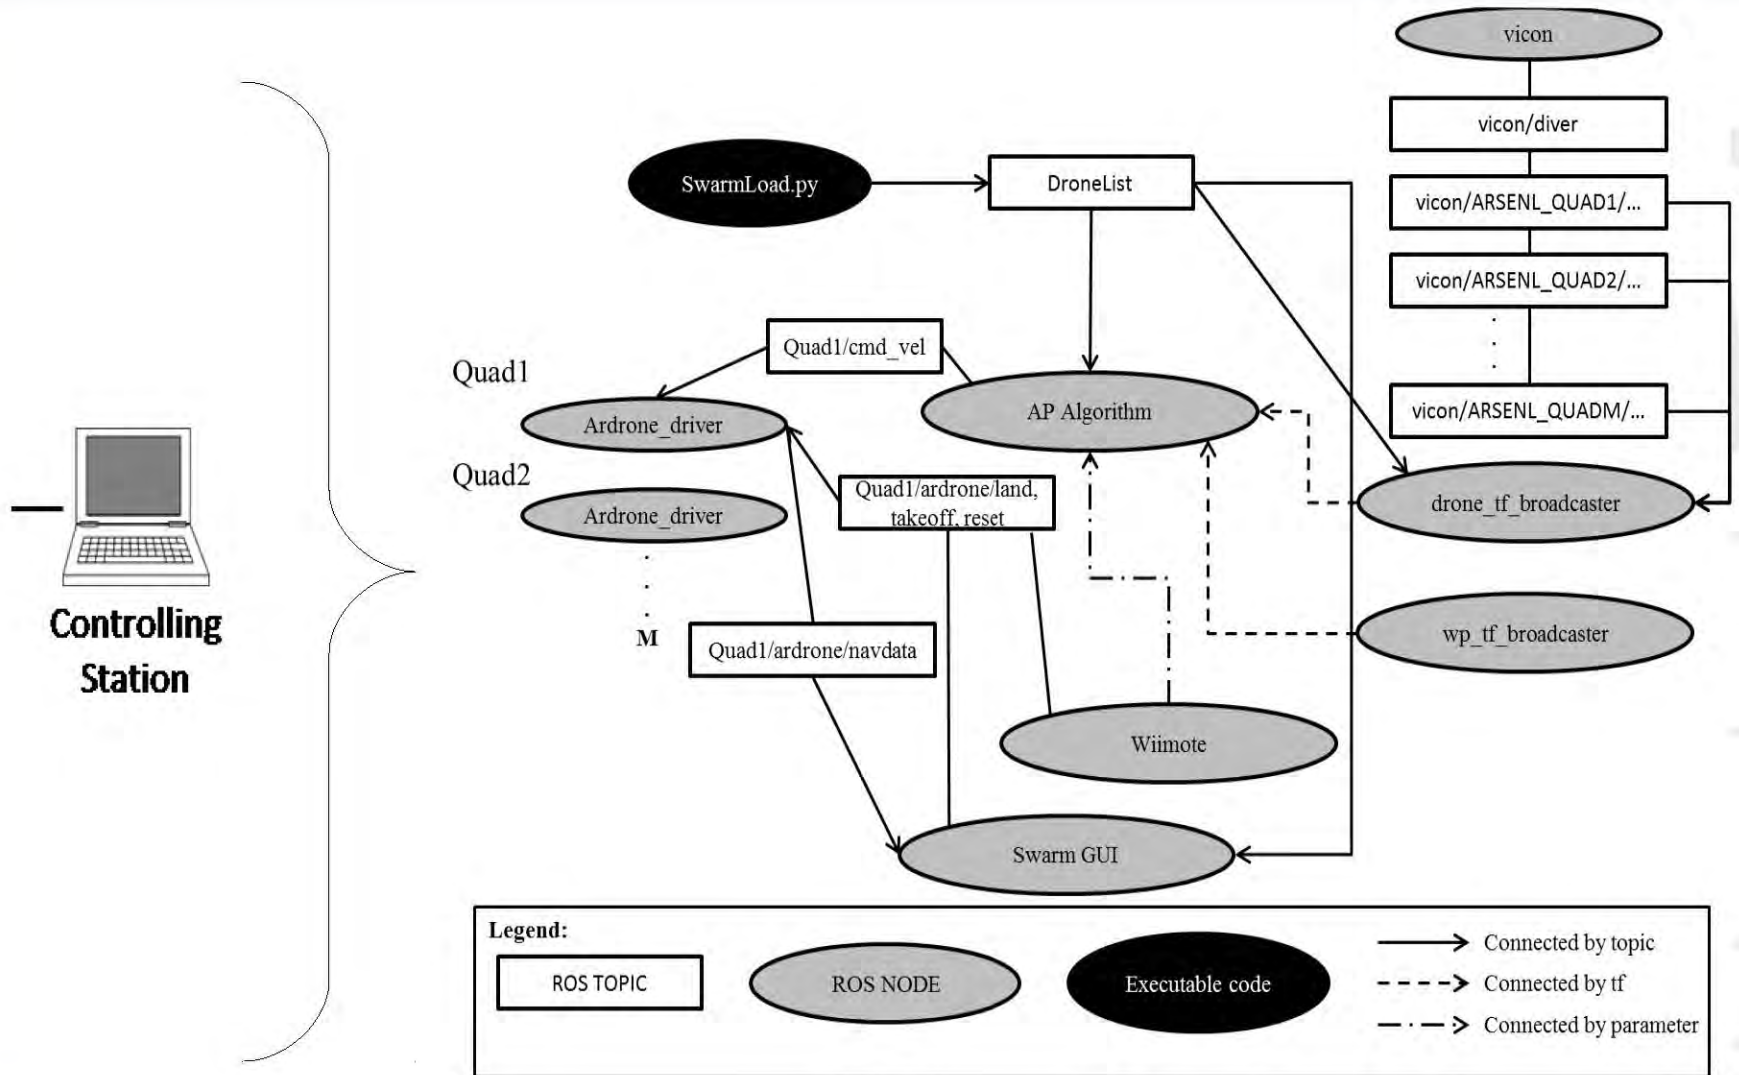

- Hand-held controller, Nintendo Wiimote, used for takeoff, landing, reset, parameter adjustment, and AP engine control
- Graphical User Interface used for group or single drone takeoff, landing, reset, and monitoring

# Hardware Integration

# Simulation Results

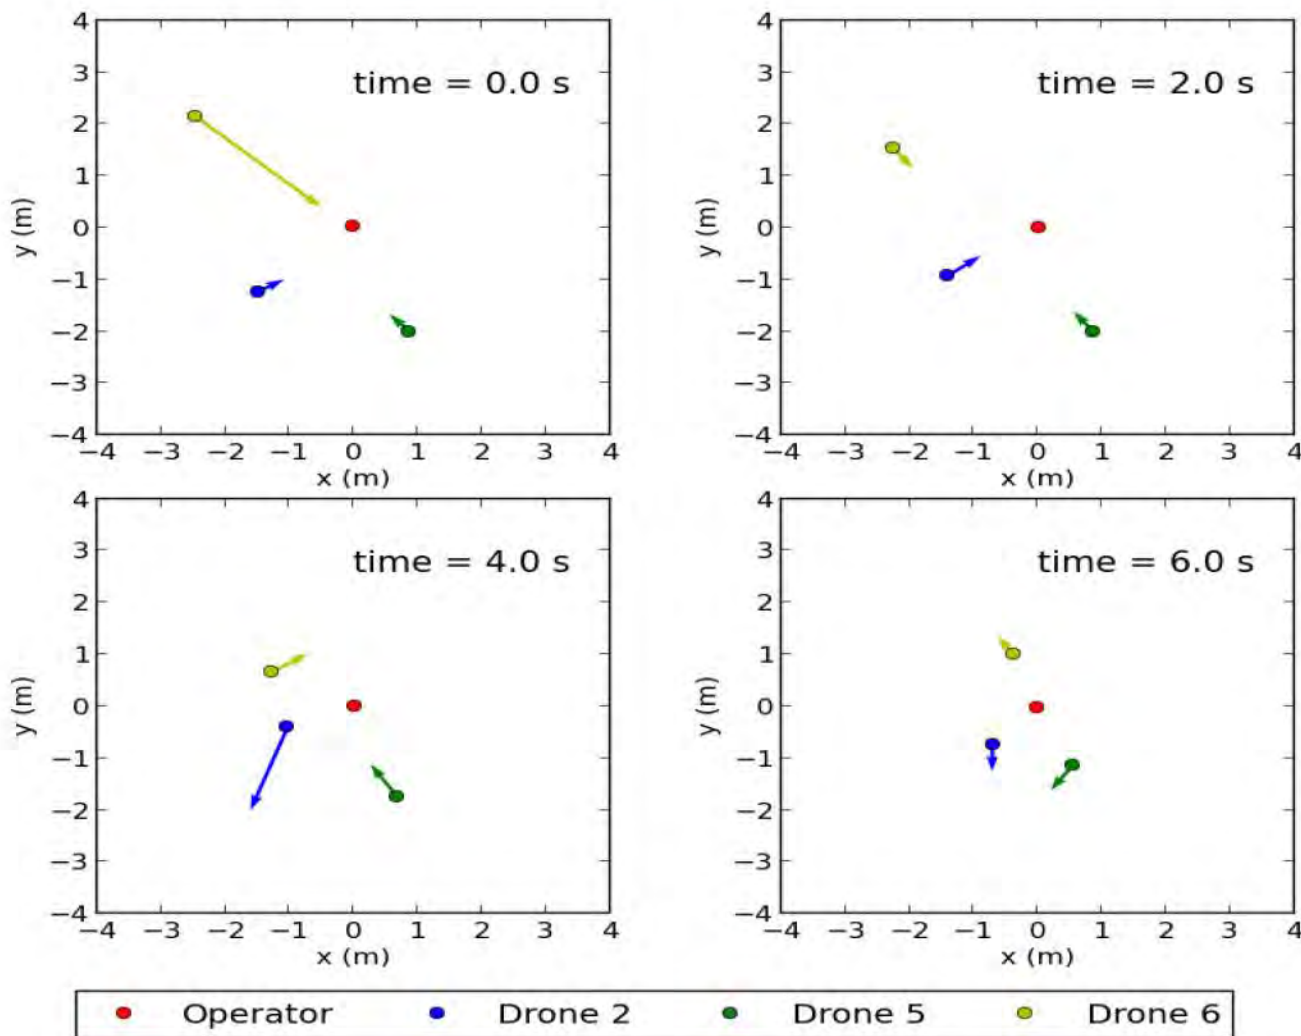

NAVAL  
POSTGRADUATE  
SCHOOL

# Physical Experimentation

# Force Vector Evolution

- After ~10 sec  
drones achieve tight  
formation around  
operator
- Stable formation  
with low separation  
error ( $< 20\%$ )

- Drones follow operator during movement
- Difficulty in recreating formation after operator stops

NAVAL  
POSTGRADUATE  
SCHOOL

# RVIZ Playback

- Demonstrated that an AP based framework allows a group of UAVs to autonomously follow a human operator
  - 2D and 3D simulations
  - Drone communication
  - Interface development: GUI and Wiimote
  - Hardware and software integration
  - Flight data playback
- Future work
  - Outdoor flight
  - More agent
  - Threat detection
  - Mission based testing

NAVAL  
POSTGRADUATE  
SCHOOL
